

Personal Project

By: **Kawtar CHOUBARI**

Supervised By: **Prof. Zakia BELAHMER**

● Who Am I ?

Hello World !

I'm Kawtar CHOUBARI, a Web & Mobile Engineering Student at ENSIAS (National School of Computer Science and System Analysis) on Rabat.

I'm also chair of IEEE ENSIAS Student Branch, Co-Founder and Program Manager of Morocco IoT & AI Challenge, a capacity building and pre-incubation program for students and startups that have innovative ideas in the areas of Internet of Things (IoT), Artificial Intelligence (AI) and related fields. <https://morocco.arabiotai.org/>

I'm also a content creator where I mixed between my graphic design skills and sharing my coding knowledge. https://www.instagram.com/choubari_/

I'm always ready to learn new skills and looking for better opportunities to start new adventures.

● My academic Background :

- **2019-2022** : Web & Mobile Computing Engineering, *National School of Computer Science and System Analysis - ENSIAS, Rabat*
- **2017-2019** : Mathematics and Physics, *CPGE Mohammed 6, Kenitra*
- **2016-2017** : Baccalaureat, SMB BIOF, *El Mansour Ed-dahbi, Sidi Kacem*

● Learn-how skill

I love learning new things especially if I feel that they will be beneficial for me like what I did with Graphic Design, Social Media Management skills.

When I want to learn a certain skill, I try to search about it and ask myself if I'm really in need of it, if yes I make it one of my priorities and free up some time in my weekly schedule to study and learn that skill.

And finally, to keep up the consistent work, I just do my best to enjoy the process and find the best materials out there on the internet.

● Qualities

- a highly motivated person
- dynamic
- persevering
- rigorous
- helpful

- **Soft skills**

- Confidence
- Critical Thinking
- Problem Solving
- Responsible
- Good Communication skills
