

Professional Project

By: **Kawtar CHOUBARI**

Supervised By: **Prof. Zakia BELAHMER**

- How do I see myself in the short and long term ?

- **Short term :**

- Succeeding in my academic studies
- Enriching my technical skills by working on more projects
- Learning new programming languages
- Getting a good job and Working with a creative dedicated team

- **Long Term :**

- Sharing knowledge I acquired and helping new students and programmers finding their paths
- Innovating by creating new solutions using technology for the benefit of humanity

- Which job is suitable for my diploma and specialities?

- **Web Engineer**
- **Mobile Developer**
- **Full Stack developer**
- **Web&Mobile Consultant**
- **Project Manager**

- My orientations :

I currently prefer to finish my studies and get into work either in Morocco or abroad. But after some years (5 or more) I can rethink my situation and continue my studies in research or apply for Phd with an innovative project idea.

- In which sector I would like to work?

As I heard from many people either in my family or close friends, I don't think that I will find in the public sector what suits my needs. That's why I'm opting in the private sector either a multinational or a startup and I believe that I will learn and gain more experience there, also help and contribute as much as I can.
